Opera

/// Vision

We want to offer **concrete and innovative solutions** that simplify every project. To achieve this, we constantly listen to our customers' needs and support them by developing products that are increasingly reliable, practical, and effective.

/// Alongside tilers since 1977

As a leading company in the production of adhesives, sealants, and technical mortars for the construction industry, we have been working with tilers, distributors, retailers, showrooms, and design studios since 1977, **providing products that make the work of those in the tiling sector easier, both in Italy and around the world.**

We also manage logistics, guaranteeing punctual and efficient deliveries throughout Italy.

**We are the established answer
for those seeking solutions
that simplify tiling work:
a specialist company you can count on.**

Since 2023, we have been part of Fornaci Calce Grigolin, a historic company that is a byword for quality, specialisation, and innovation in the industry. Our commitment is constantly to raise the quality of our materials and processing methods by developing and implementing increasingly sustainable production processes.

For us, every project counts.

Because every project deserves maximum dedication, our work starts by **directly listening to the needs of tilers**. That's why we develop our chemical building products internally, following a process aimed at offering **reliable, high-performance solutions**.

What sets us apart?

/// Cutting-edge research

our specialised research centre develops innovative products, ensuring the highest quality on the market.

/// Tailored support

thanks to our pre- and after-sales service, we offer tilers complete and continuous support.

/// Ease of use

our durable, easy-to-apply, and always ready to use products make work more precise.

/// Our formula for guaranteed quality

For Opera, quality is not just a slogan - it is a method. We combine research, experience, and control at every stage to ensure the best possible product.

What must a product be to make a difference on a construction site?

It must be effective and durable, practical and simple to apply, and capable of meeting specific needs.

To achieve these goals, we:

/// Listen

to professionals
to develop reliable,
high-performance products.

/// Certify

quality at every step:
All our solutions comply with European
regulations and are subjected to
rigorous internal and external checks
to offer safe and reliable products.

/// Evolve

our solutions:
every formula is born from a targeted
research process to guarantee
maximum effectiveness on the job site.

/// Control

the entire supply chain,
from the extraction of raw materials
to packaging, to ensure production
continuity and the authenticity of quality
Made in Italy.

/// Development, production and distribution

In our industry, **technical expertise** and **in-depth knowledge** of materials and their installation make all the difference.

Opera's specialisation stems from this **hands-on experience**, built in close collaboration with **industry professionals**. This invaluable knowledge base grows every day through constant dialogue and the sharing of **targeted technical solutions**.

How do we turn experience into innovation?

We have created a dedicated research and development centre, a genuine **hub of ideas** that generates concrete projects, which are designed **to meet - and often anticipate - the needs** of a constantly evolving market while maintaining excellent **value for money**.

Our pursuit of excellence allows us to collaborate with the most qualified research centres and specialised laboratories.

How do we guarantee the best product?

We select **high-quality raw materials** from the numerous quarries of Fornaci Calce Grigolin and subject them to **strict technical checks** in our laboratories.

Our modern, technologically advanced facilities ensure high performance, consistent quality, and a uniform mixture over time, so the technical and performance characteristics always remain the same.

How do we ensure timely deliveries?

Our automated and versatile packaging process allows us to package products in containers ranging from 1 to 25 kg. This is supported by a fast and efficient logistics service that guarantees complete orders and timely deliveries.

As part of Fornaci Calce Grigolin, with 6 plants and 15 depots in Italy and a presence in Germany and Switzerland, we can ensure **continuity of supply, widespread support, and effective assistance for construction sites**, all backed by a solid industrial structure and constant attention to practical details.

We carefully manage every phase because excellence stems from the balance of experience, innovation, and responsibility.

/// Pre- and after-sales support

We are always by our customers' side, before and after a purchase. Our support goes beyond just products; we offer continuous consulting, technical support, and assistance

With a **flexible, people-centric approach**, we adapt to the needs of tilers, showrooms, and distributors. Our **technical sales team** is made up of professional agents with in-depth industry knowledge, acquired through hands-on experience and continuous training to provide quick, targeted answers for every customer. Our service does not stop at the point of sale: we are also present on-site to provide technical support, ensuring correct applications and optimal results.

**With Opera,
service extends
far beyond
product delivery
- it starts before
and lasts much
longer.**

/// Sustainability and certifications

Building well, building sustainably

With our materials, we don't just create projects of any size; We want to help build a better future, leaving a legacy of quality construction for future generations. That's why **we pay great attention to the impact of our products and actions on the surrounding environment.**

/// Quality recycled materials

We prioritise aggregates from certified repurposing processes, promoting a more circular and responsible supply chain while maintaining the high performance of our products.

/// Sustainable production

We create products using programmes that minimise environmental impact.

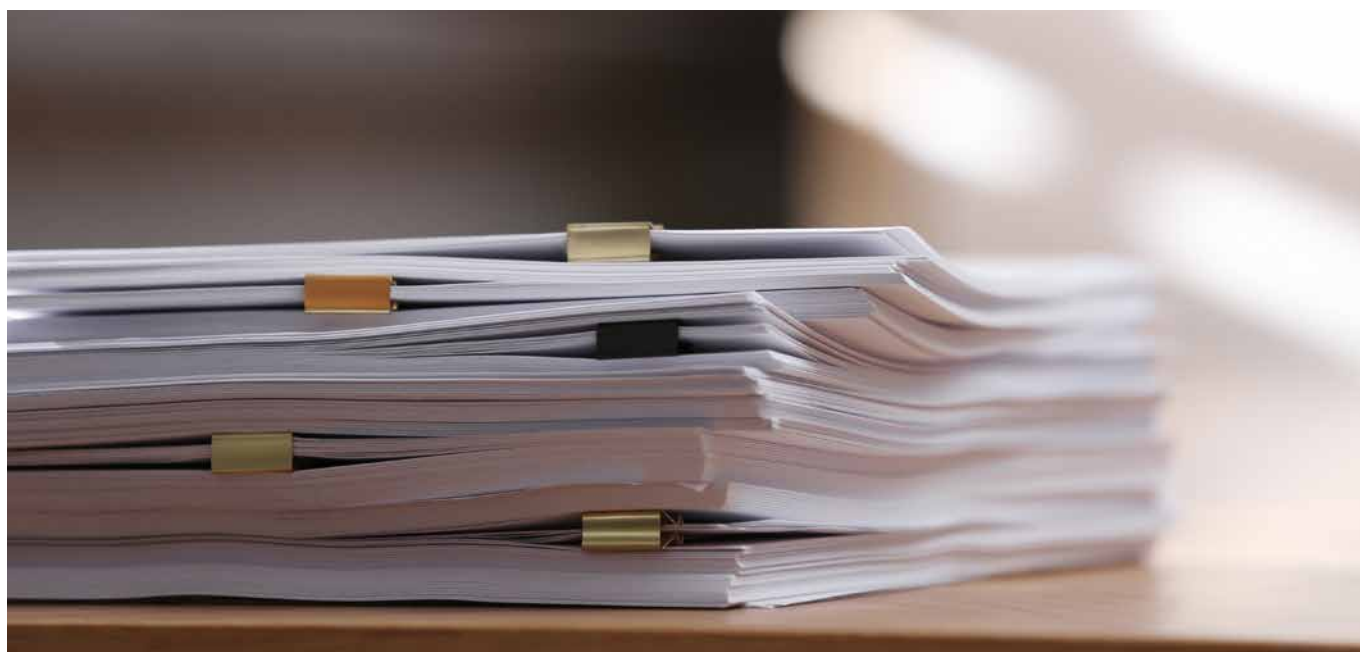

/// Locally-sourced raw materials

We select resources from quarries near our plant, limiting polluting emissions.

Certifications

Our commitment is to guarantee products that not only meet but exceed all expectations, ensuring every job is an impeccable masterpiece of craftsmanship.

This approach has made us **one of the most reliable and authoritative companies in the construction sector, in both Italy and Europe, with tests and certifications performed in Germany.**

Our certificates

Opera uses a **UNI EN ISO 9001** certified quality management system and holds **UNI/PdR 88:2020** certification, which attests to the recycled content in our products and compliance with the current CAM Edilizia decree.

Our floor preparation products comply with European standard **UNI EN 13813**.

Our cementitious waterproofing products comply with European standard **UNI EN 14891**.

Our adhesives comply with European standard **UNI EN 12004**.

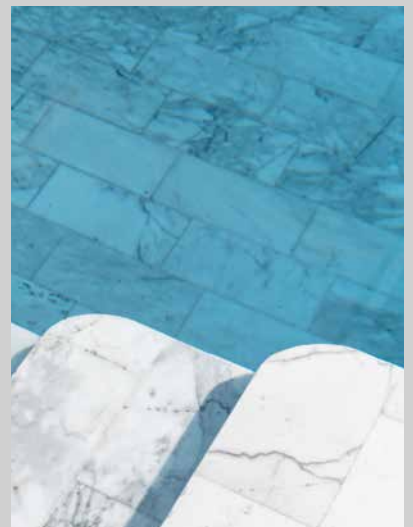

All our technical repair mortars comply with European standard **UNI EN 1504**.

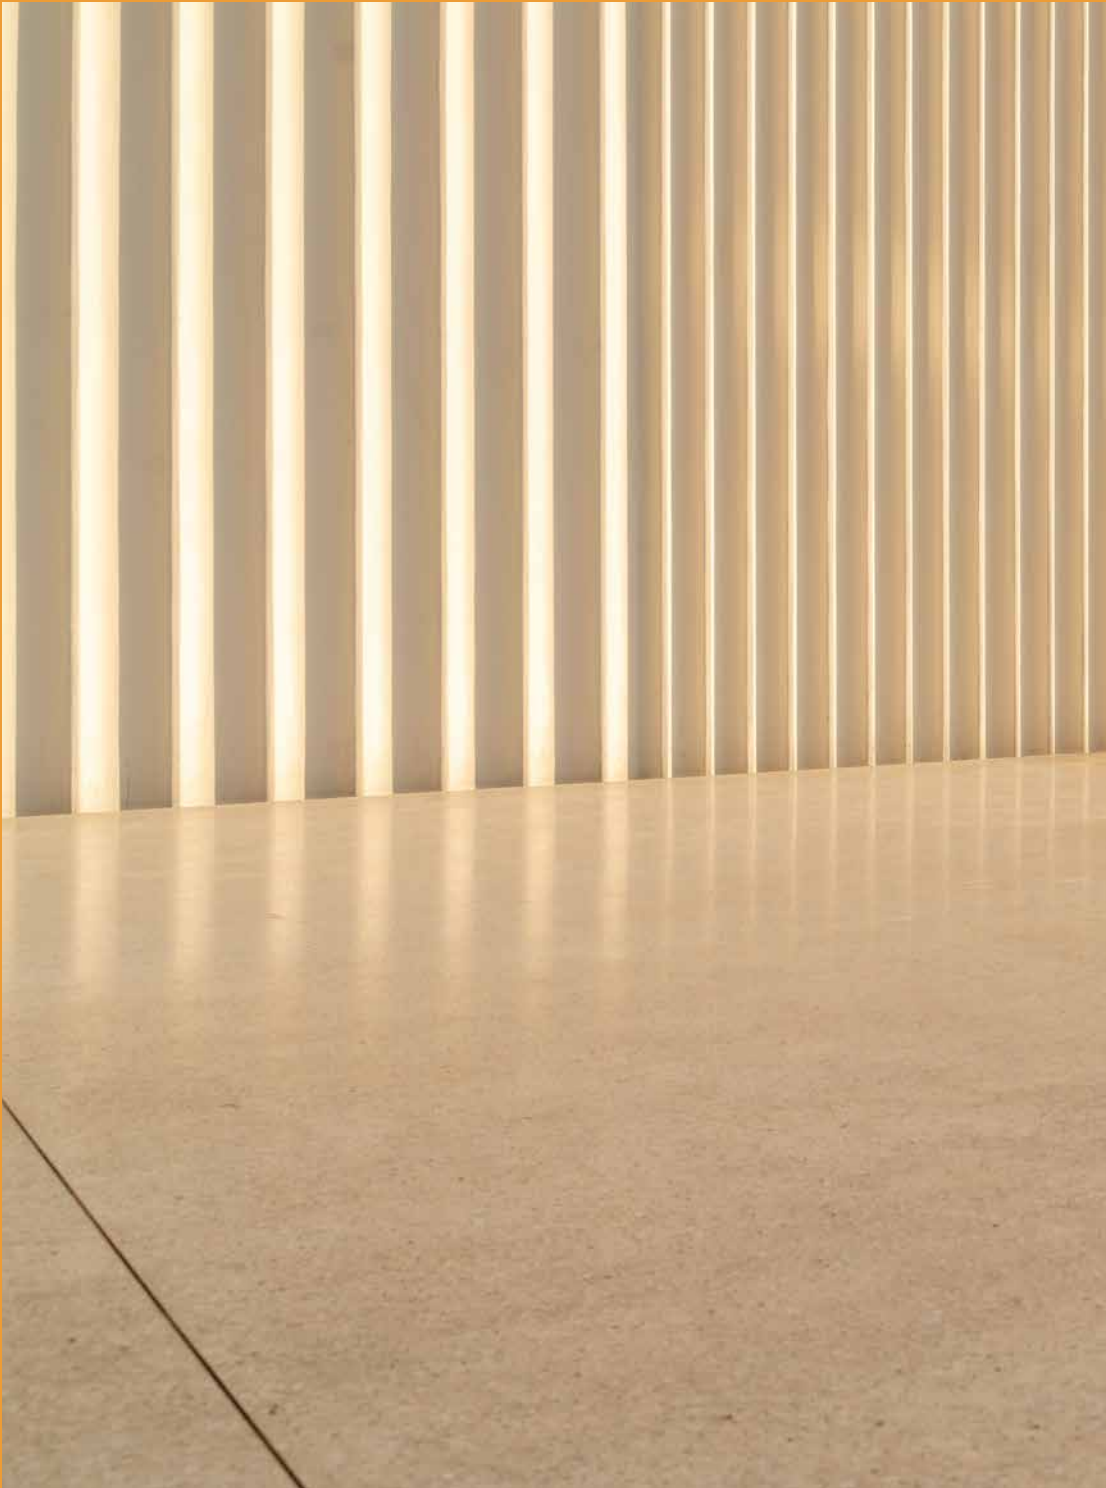

We constantly improve our products and technical documentation, taking into account the requirements set out in **UNI 11493**, which regulates ceramic tiling for floors and walls.

/// Floor preparation products /// Waterproofing products
/// Adhesives /// Joint fillers /// Technical mortars

Floor preparation products

/// Floor preparation products

Our floor preparation products are the ideal choice for professionals aiming for efficiency, precision, and reliability on the job site. Designed to **ensure stable, level, and perfectly bonded surfaces**, they reduce working time, minimise errors, and guarantee maximum performance for subsequent tiling or finishing steps.

Why choose Opera floor preparation products?

Our range includes **traditional, fast-drying, and self-levelling screeds, thixotropic skim coatings, and various types of primers**. These products ensure flatness, optimal adhesion, and durability for subsequent layers, guaranteeing perfectly level surfaces for a flawless installation.

Versatile and high-performing, Opera floor preparation products adapt to a wide range of substrates and environmental conditions, both indoors and outdoors, helping to improve the overall efficiency of the applied system and ensuring consistent, reliable, and long-lasting results.

Waterproofing products

/// Waterproofing products

Protecting surfaces and structures from water and humidity is essential for ensuring long-term durability and safety. Our waterproofing products are designed to offer **reliable and lasting solutions in any context**, protecting materials and buildings.

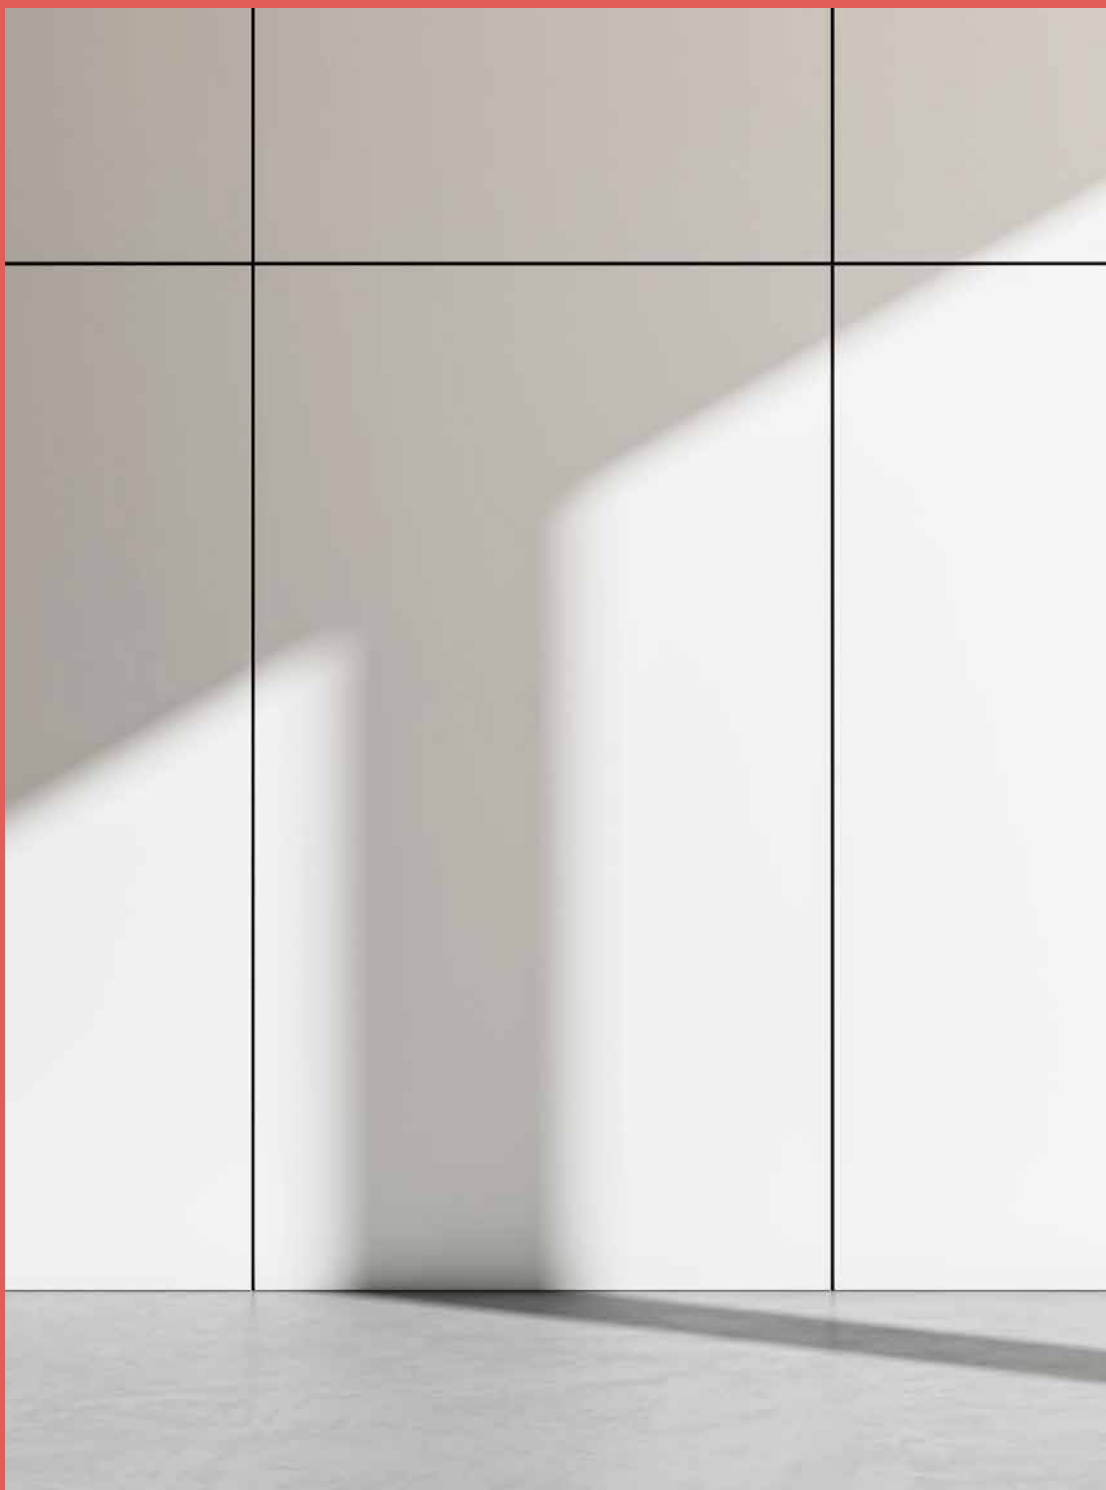

How do we guarantee effective protection against water and weather?

Our range includes **cementitious and dispersion waterproofing products, osmotic coatings, water-repellent sealants, membranes, and their related accessories, as well as protective paints**. These products form a resistant and durable barrier that is versatile and suitable for multiple applications, both indoors and outdoors.

Adaptable to different structural elements (slabs, walls, tanks, manholes, and swimming pools), they ensure continuous protection against water infiltration, humidity, and atmospheric agents.

Adhesives

/// Adhesives

To ensure the perfect laying of floors and tiles, it is essential to rely on products that combine strength, flexibility, and ease of application. Our adhesives are designed to meet the diverse needs of construction sites, adapting to large formats and different conditions.

What makes us your best ally?

Our range includes **cementitious and reactive, thixotropic, and deformable adhesives, all designed to ensure high adhesion and excellent workability.**

They can be used in both indoor and outdoor environments, on floors and walls, even where there are mechanical stresses or extreme temperature changes.

Thanks to their characteristics, they guarantee reliable and long-lasting performance, simplifying the application process and ensuring a high-quality final result.

Joint fillers

/// Joint fillers

The quality of a surface isn't just measured by its aesthetic appearance, but also by the strength and protection of the joints between the tiles. Our sealants are designed to **ensure functionality and durability, preserving the integrity of the joints over time.**

They are also available in a wide range of colors, specifically designed to harmonize perfectly with every type of tile and project style. From neutral and subtle shades, ideal for a uniform and elegant effect, to bolder contrasts intended to enhance geometry and grout lines, each color is carefully selected to provide **aesthetic consistency and design freedom.**

This color variety allows for the **customization of any space**, whether residential or commercial, precisely adapting to matte, glossy, textured, or natural surfaces, and supporting every style: from classic to contemporary, from minimal to industrial.

Perfect sealing and guaranteed resistance? It's possible!

Our range includes **cementitious sealants available in various grain sizes, epoxy, acetic, and silicone sealants, epoxy resins, primers, and additives.**

These products, suitable for both indoor and outdoor use, provide effective filling and sealing action, offering resistance to dirt, water, and chemical agents. They are ideal for environments subject to humidity, such as kitchens, pools, and spas, for a perfect and long-lasting finish.

Technical mortars

/// Technical mortars

Technical mortars are the ideal solution when **high performance and reliability are required for restoration and structural reinforcement operations.**

Our products guarantee strength, practicality, and durability, meeting the needs of civil, industrial, and infrastructure projects.

What truly makes the difference?

Opera's range of technical mortars includes **high-performance products specifically formulated for the reinforcement and restoration of concrete or masonry elements.** In addition to structural mortars, the line also includes adhesives, technical skim coatings, protective paints, and consolidating products, developed to **ensure effective work even in critical environments** like tanks, manholes, purifiers, underground structures, and those exposed to chemical agents or heavy mechanical stress. All products guarantee durability and ease of use, even under the most demanding conditions.

Technical mortar fields of application

Our technical mortars are suitable for various application areas, all sharing one common denominator: quality.

/// Civil

Specific solutions for civil construction, designed to ensure strength and durability in everyday projects.

/// Roads and infrastructure

Products engineered for viaducts, road tunnels, and railway tunnels, capable of withstanding mechanical stress and weather conditions.

/// Industrial

Solutions dedicated to industrial construction and hydraulic structures, capable of handling aggressive environments and complex applications.

/// Your partner for performance and lasting results

Our commitment goes beyond our products. We aim to build solid, long-lasting relationships with those in the tiling industry, supporting every customer with expertise, care, and concrete solutions. Through experience, research, and innovation, we constantly improve our product lines, making work safer, more efficient, and more sustainable.

With Opera, every project achieves high standards of reliability. From the choice of materials to their application, we guarantee consistent performance, excellent results, and a future built on quality, professionalism, and responsibility towards people and the environment.
