

Detergente AC

Buffered acid detergent for removing efflorescences and cement residues after tile laying, for indoor and outdoor application.

Fields of application:

- for cleaning efflorescences caused by soluble salts rising to the surface of tiles and joints;
- for cleaning the surface of tiles and joints from lime efflorescences;

- for removing cement-based residues (glues, sealants or mortars) from floors and walls;
- professional use only.

Application:

put on safety gloves and goggles before beginning the application. Drench the cement joints with water, and do the same for porous materials (terracotta, plaster/render, cement flooring) before spreading the **Detergente AC**. Pour the **Detergente AC** onto the surface to treat and rub with a brush or abrasive sponge; leave to work for 5 minutes then rinse repeatedly with plenty of water. When cleaning large surfaces, work gradually, cleaning small areas at a time. Stubborn stains and scaling can be eliminated by repeating the operation in specific areas and scrubbing vigorously.

Quality and Environmental Standards:

Detergente AC undergoes constant, careful testing at our laboratories, in compliance with the legislation in force - UNI EN ISO 9001/2015.

Warning

- Never use on marble, slate, or limestone;
- rinse the surfaces washed with plenty of water;
- before application, carry out a test on the product that needs to be cleaned to make sure no damage will occur;
- do not use on ceramics which are not acid-proof;
- use safety gloves and goggles during use;
- wait at least one week before cleaning the entire surface;
- handle with care, protect eyes, and rinse off any parts that may come into contact with the product. In more serious cases of exposure, seek medical advice;
- do not allow the product to work on the joints.

Technical and application specifications

Hazard classification as per Directive 99/45/EC: **irritant**

pH: **1,5**

Flammability: **no**

Application temperature: **from +5°C to +35°C**

Waiting time for rinsing: **5 minutes**

Harmonised customs code: **28111900**

Characteristics		Application methods		Consumption	
Ready-for-use It does not release toxic fumes For indoor and outdoor application		Scrubber Abrasive sponge		150-200 gr /m²	
				Storage Detergente AC has a shelf life of 12 months in the original packages at temperatures above +5°C.
