

# Disarmoil

**Concentrated formwork demolding agent  
for concrete cast in wooden formworks.**

## Fields of application:

- for soaking formworks in raw and planed wood or plywood;
- professional use only;

## Characteristics:

**Disarmoil** is a concentrated chemical formwork demolding agent of vegetable origin for wood. It is studied for the quick demolding of wooden formworks, getting excellent exposed façade finishes. This product is indicated for indoor and outdoor civil, commercial and industrial applications.

## Preparation:

we recommend you remove any foreign matter or fragments of hardened concrete from the formworks before priming.

## Application:

**Disarmoil** must be diluted in clean water and applied with short bristle roller or brush. The concentration of **Disarmoil** depends on the absorption of the wooden substrate to be treated, with a dilution from 20 l of water every liter of **Disarmoil** to 10 l of water every liter of **Disarmoil**.

In case of high absorption, a second coat of **Disarmoil** may be applied.

## Quality and Environmental Standards:

**Disarmoil** undergoes constant, careful testing at our laboratories, in compliance with the legislation in force-UNI EN ISO 9001/2015.

## Warning:

- do not apply to metal, plastic or non absorbent formworks;
- do not use Disarmoil neat.

## Technical and application specifications

Hazard classification as per Directive 99/45/EC:	<b>none</b>
Specific weight:	<b>0.900 g/cm<sup>3</sup></b>
Dilution ratio:	<b>1:10</b>
Application temperature:	<b>from +5°C to +35°C</b>
Drying time:	<b>3-5 hours</b>
Flammability:	<b>no</b>
Harmonised customs code:	<b>34039990</b>

Measurement of data at 23°C/50% Residual Humidity and no ventilation. The data may be considerably modified by the conditions of use.

Characteristics	Application methods	Consumption
