

# Rivepox Wine

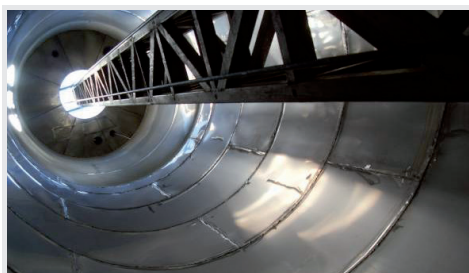

**Non-toxic two-component vitrifying product for coating metal and concrete containers for food use.**

## Fields of application:

- coating of internal surfaces of cisterns, tanks and bins designed to contain wine, wine-making by-products, or other liquid or solid substances intended for human consumption

- coating or painting of internal parts of machinery in contact with food, such as hoppers, autoclaves and kneading machines
- professional use only

**Rivepox Wine** is designed to meet specific requirements of the food sector. An exclusive product offering the possibility of permanently coating the surfaces of metal and concrete containers for containing drinking liquids or solid food for human consumption.

**Rivepox Wine** is mixed in a 10:2.5 ratio and it is applied on perfectly clean and nondamaged surfaces by roller, brush or airless. Possible smoothing for an even surface must be made with **Fibrocem Tissotropico**.

**Rivepox Wine** is influenced by climatic conditions, thus it is recommended to apply it on substrates with a temperature from 10°C to 40°C, and a relative humidity below 85%. Always apply the primer **Primer Rivepox Primer** before. **Rivepox Wine** is applied wearing protective gloves, mask and goggles. Suitability for the contact with water/alcohol beverages such as wine: test report no. 2423.

Characteristics	Application methods	Consumption
Two-component product Application temperature: +5 to +40°C Average waiting time for the 2nd coat: about 12-24 hours Average coat thickness: 1.5/2 mm Use of the product: 4-6 days Appearance of the vitrifying product: ivory/red Porosity (porotest Electro-physic at 2000 volts): no pore Recommended thickness: 2.5-3 mm (max. 7.5 mm) Surface drying: 12 hours Deep drying: 24 hours Waterproofing: excellent Working temperature: from -20°C to +80°C	Roller Brush Airless	1-1,20 kg/m <sup>2</sup> in double layer Minimum thickness not less than 2,50 mm
		<b>Storage</b> Shelf life of 12 months in the original packages and in a dry place. Frost and heat sensitive.
